DOS: July 16, 2024

AI-Based Plan Of Care

1. Weight Management

- Preliminary Assessment: BMI of 46.4 indicates severe obesity. - Proposed Intervention:

- Referral to a registered dietitian for personalized diet counseling.
- Encourage increased physical activity tailored to patient's tolerance.

2. Hypertension Management

- Preliminary Assessment: Blood pressure of 155/85 indicates hypertension stage 1. - Proposed Intervention:

- Medication review and possible adjustment.
- Encourage lifestyle modifications, including a low-sodium diet and regular physical activity.

3. Immunization Review

- Preliminary Assessment: Incomplete immunization history, uncertain about flu, pneumonia, and COVID-19.

Changes:

1. Reduce the spacing between the red title **AI-Based Plan of Care** and the first item.
2. Add the practice logo to the top left-hand part of the report (see Provider Report if you need assistance in how to do that)
3. The format of the report keeps changing. It should be like this:

1. Weight Management

Preliminary Assessment

- BMI of 46 indicates severe obesity

Proposed Intervention

- Referral to a registered dietitian for personalized diet counseling
- Encourage increased physical activity tailored to patient's tolerance

2. Hypertension Management

3. Etc, Etc, Etc
