Bug

In www.welltrackone.us/portal, after you save your template data and click on "Patient" you see your patient's demographics:

 Patient

 Encounter

 Admin

Patient Detail

Patient Information

Patient Information

First Name	Bunny
Middle Name	J
Last Name	Rabbit
Nick Name	Bunny
DOB	11-11-1911
Gender	Male
SSN	SSN

However, the Date of Birth (DOB) has been transformed into 11-11-1911 instead of 11/11/1911 for some reason.

Then for some unknown reason, when you SAVE, the DOB is wiped out and goes to NULL.

SSN

SSN

It should stay as 11/11/1911 and stay preserved when that screen is saved.
